Debit Credit Notification (camt.054)

GENERAL

This Quick Guide describes the new functionality to fetch “Debit Credit Notifications” in camt.054 format and display them in your account statements.

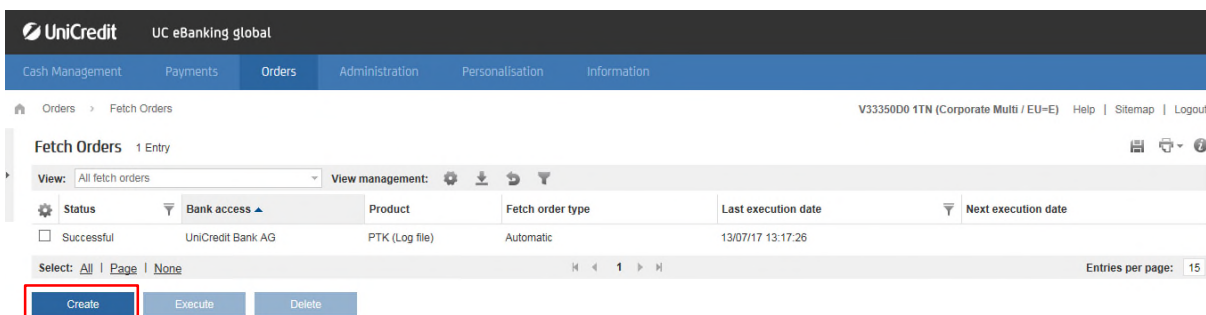

PRECONDITION

You need a contractual agreement with UniCredit for fetching your account statements in camt format and the order type „C54“ for specific accounts.

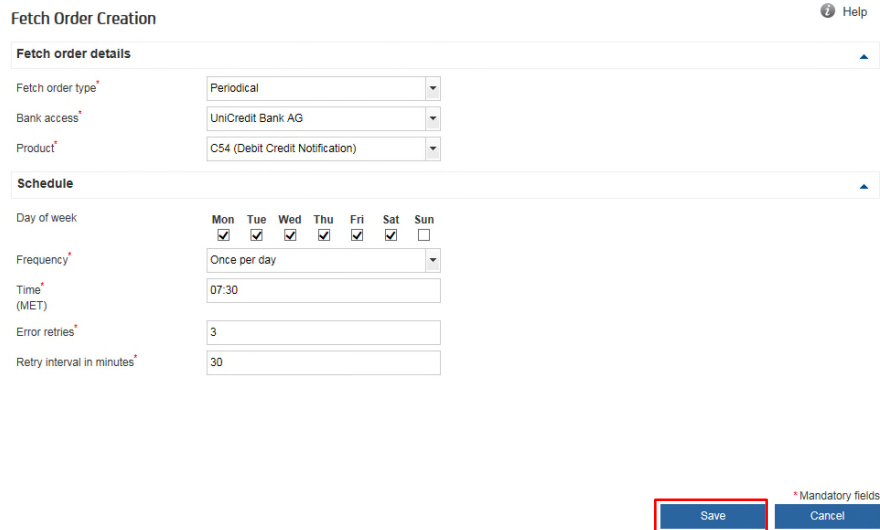

FETCHING OF FEE REPORT

To receive camt.054 files you need to create a new fetch order. We recommend to create a periodical, daily order.

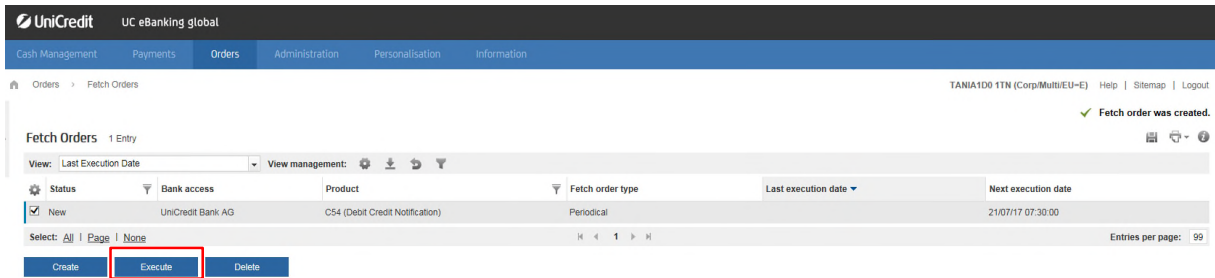

„Orders“ - „Fetch Orders“ – „Create“

The screenshot shows the UniCredit eBanking interface. The top navigation bar includes 'Cash Management', 'Payments', 'Orders', 'Administration', 'Personalisation', and 'Information'. The 'Orders' section is active, showing 'Fetch Orders' with 1 entry. A table lists the order details: Status (Successful), Bank access (UniCredit Bank AG), Product (PTK (Log file)), Fetch order type (Automatic), Last execution date (13/07/17 13:17:26), and Next execution date. Below the table, there are buttons for 'Create', 'Execute', and 'Delete'. The 'Create' button is highlighted with a red box.

The screenshot shows the 'Fetch Order Creation' form. It is divided into two sections: 'Fetch order details' and 'Schedule'. In the 'Fetch order details' section, the following fields are visible: 'Fetch order type' (Periodical), 'Bank access' (UniCredit Bank AG), and 'Product' (C54 (Debit Credit Notification)). In the 'Schedule' section, the following fields are visible: 'Day of week' (Mon, Tue, Wed, Thu, Fri, Sat, Sun), 'Frequency' (Once per day), 'Time (MET)' (07:30), 'Error retries' (3), and 'Retry interval in minutes' (30). At the bottom right, there are 'Save' and 'Cancel' buttons. The 'Save' button is highlighted with a red box. A legend indicates that fields with an asterisk (*) are mandatory.

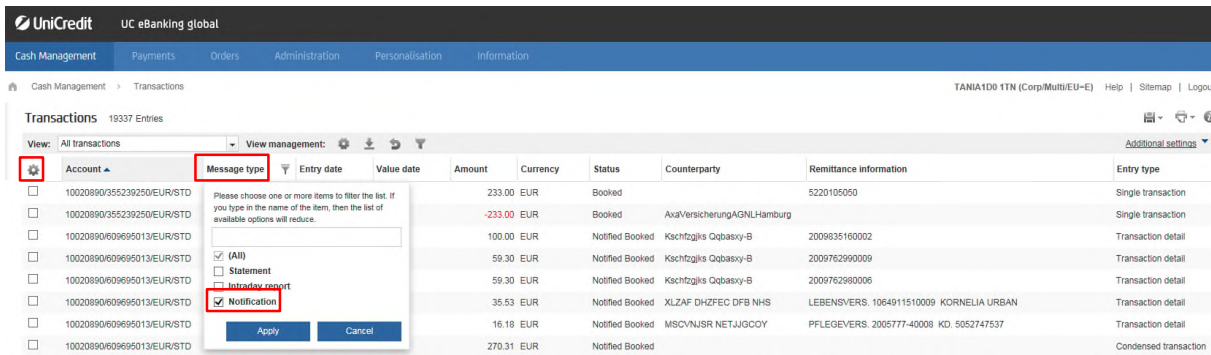

With the button „Execute“ the order will be executed for the first time. Afterwards it happens automatically like in our example every morning (Mo.-Sa.) at 07:30 a.m.

You need as well a fetch order for the account statements in camt format (camt.053), because they are not fetched automatically like the statements in SWIFT format.

DISPLAY OF DEBIT CREDIT NOTIFICATION

The fetched debit credit notifications are shown in “Transactions” with message type “Notification”. To select this type, please add via “Configure columns” icon the column “Message type”.

„Cash Management“ – „Transactions“

You have also the possibility to see these notifications directly in the account statements. The account statement has to be fetched before in camt format as mentioned.

“Cash Management” – “Account statements”

Account details

Account 10020890/609695013/EUR/STD
 Account number 609695013
